The **co-operative** membership

The Co-operative and the Transition Network are committed to addressing the effects of climate change on our environment.

Working together within our communities we have the potential to limit environmental damage both locally and globally.

The Transition Network will look at how a community-led response can address the dual issues of climate change and peak oil. The Co-operative Farms will show how they are working towards the highest environmental standards and the Plunkett Foundation's will talk about their 'Making Local Food Work' Project.

You will also have the opportunity to attend a number of workshops which range from Community Supported Agriculture to Bread Matters: a case study from the Handmade Bakery.
